SECTION – A

(READING SKILLS)

(22 Marks)

1. Read the following passage carefully : 12 M

- (1) Marketing is all about creativity and expression, so it must be an art, right? Not necessarily. While marketers once relied purely on instinct, they now rely on data-driven insights. On top of that, cutting-edge technologies and analytics have shifted the focus of marketing farther toward the science side of the spectrum. Armed with so much data, marketers can now track the impact of money spent on their bottom line.
- (2) In today's world, the best approach to marketing combines both disciplines. And there's a distinct balance to the craft – a strategic mix of interpersonal empathy and tactical analysis. Neither side of the mix can be isolated or ignored, or the results will not be encouraging. Psychologists believe the brain is separated into two distinct functions : the left-brain and the right-brain. The right side of the brain is responsible for creative thinking and artistic intuition.

- (3) As an art, marketing is all about understanding the nuances of human behaviour and determining how to make an emotional connection with the customer. More importantly, some level of art is needed to create brand standards for your company, including the logo, messaging, and overall visual identity for a brand.
- (4) Right-brained marketers focus on the creative – the copy, graphics and emotions tied to the message. The science side of marketing tells us to let the data guide what strategies will be most effective. Marketers are now reporting the need for digital-first expertise including digital proficiency, data analysis, and data science. With science, marketers adopt an outcome-centric mindset that helps them curate smarter campaigns. Over the past few years, there has been an evolving prioritization on data-savvy talent. In 2020 and beyond, brands will need to focus on recruiting talent that can understand the complexities of AI and machine technologies.
- (5) But when we reflect on earlier times, marketing was defined as the predominance of traditional advertising, like television, newspaper, and direct mail. Today, it ropes in digital channels, social media, mobile devices, and integrated, complex campaigns. And just as consumers today are more tech-savvy, employees should be able to match – and exceed – their expertise. It's important that brands continue to prioritize creative, engaging campaign messages while also focusing on key insights and performance metrics for optimal results.
